

End Austerity Now Demonstration

Hundreds took to the streets yesterday to protest against the content of the [Queen's Speech](#) - the government's plans for the next five years.

The speech promised more welfare cuts, at a time when we expect the government to go ahead with a £100 billion replacement of Trident, our nuclear weapons system.

If you agree that the government has its priorities wrong, join the Scrap Trident bloc on what will be a huge anti-austerity protest in **London** on Saturday, **June 20th** at **12 noon**. *60 thousand people have already confirmed their attendance - be a part of this important day!*
