# WE DEMAND:

1. Emergency funding of £20 billion to save lives this winter
2. Invest in a fully publicly owned NHS & guarantee free healthcare for future generations
3. Pay staff properly: without fair pay, staffing shortages will cost lives

This will be the hardest winter ever in health and social care. We must act to safeguard services for patients and service users, boost staff morale and tackle the mental health crisis among health and care staff. Emergency funds must be secured now to avert disaster.

We must repair crumbling hospitals; restore NHS beds, recruit, retain, train and properly pay health and care staff; rebuild underfunded public health and GP services struggling to respond effectively to Covid; publicly fund a service for care and independent living support; and much more. The Health and Care Bill does none of these things. We need new legislation to secure a fully public NHS and end privatisation.
