

The government is buying 12 F-35 nuclear-capable fighter jets: a significant expansion of Britain's nuclear capabilities. The country will now be able to launch nuclear weapons from both the sea and sky. This is yet another disastrous decision by the government, which will increase the risk of nuclear weapons being used in war and take more money away from our public services.

We, the undersigned, call on the government to:

- ☐ Scrap plans to buy these nuclear jets
- ☐ Commit to scrapping Britain's entire nuclear weapons system
